Logo, wordmark & tagline usage

Adopted 19 Aug 2026, revised 19 Aug 2026 after a detailed section-by-section review. Rules for when the full logo lockup, the wordmark alone, and the GG symbol are used across the website.

SOURCE

docs/BRAND-GUIDELINES.md

APPLIES TO

concepts/premiere-red/ & root index.html

01 The three levels

- **GG** — the icon/symbol. Secondary brand device.
- **GATTILLO GLOBAL.** — the corporate brand (wordmark).
- **“WE POWER ENTERTAINMENT.”** — the positioning statement / brand promise.

Don't default to stacking all three on every page — that reads as a sales brochure. The **full lockup** (all three together, as the one master-logo graphic) is reserved for exactly two places: the homepage hero and the footer. Everywhere else uses GG + wordmark only, no tagline.

02 Where each element goes

- **Header, every page** — GG + GATTILLO GLOBAL, compact. No tagline, no full logo.
- **Homepage hero** — the full lockup image, large. Below it, a headline that says what the company does — not a restatement of the tagline, since the logo already said that.
- **Footer, every page** — the full lockup image, bookending the experience with the hero.
- **GG symbol alone** — sparse decorative device: mobile nav, a small accent next to a section kicker, or an oversized/very-low-opacity watermark. 2–3 appearances on a long page, not more.

- **Content sections** — no full logo, no standalone tagline text. Tony's section and the Our Partners page content carry no additional branding competing with them.

03 The GG mark & the full lockup

Both are cropped from the master logo's one transparent source file (`Business-Docs/LOGOs/email-signatures/gattillo-logo-black-transparent-full.png`), then recolored: icon/wordmark pixels → bone `#EDE6D8` for dark backgrounds; the tagline and its underline swoosh stay red, snapped to the site's `--red: #E8492F` .

- `gg-icon-bone.png` / `gg-icon-black.png` — the icon alone, for headers, mobile nav, and decorative use.
- `gattillo-full-lockup-bone.png` — the whole lockup, used only in the hero and footer.

Don't recreate either as CSS text/shape — always reference these image assets so the geometry stays real. An earlier pass tried a live-text tagline (red/bold/underline via CSS) next to the GG+wordmark in the footer; that was replaced once it was clear the actual full-lockup graphic was wanted instead.

04 Deployment note

www.gattiloglobal.com (production) is a Vercel deployment whose project root is `concepts/premiere-red/` , not the repo root. A path like `../../assets/...` from a page in that folder works on GitHub Pages (serves the whole repo) but 404s on production. Any asset used by `concepts/premiere-red/*.html` must live inside `concepts/premiere-red/img/` and be referenced relative to that folder — never `../` out of it.

05 Current implementation, at a glance

- **Hero** — full lockup image above a new headline ("Connecting world-class IP with the people who bring entertainment to life."), replacing the old "We power entertainment." h1.
- **Footer**, all three pages — full lockup image, replacing the earlier GG+wordmark+tagline-text combo.
- **GG watermark** — faint, oversized behind the Vision statement and the closing CTA; a small inline GG accent next to the "How We Work" kicker.
- **The Standard** — numerals now read 01/02/03 (were 1/2/3); the existing large-faint-turns-red-on-hover treatment already was the "recognizable numbered device" asked for.

- **How We Work** — the existing gate-line + red-lit progression dots already serves as the visual-progression device.
- **Tony's section** — role label now reads "The Founder Behind The Network" (was "Founder & CEO"); no logo next to his photo.
- **Nav label fix** — the "Who We Work With" link's raw HTML fallback had drifted from its own i18n dictionary (which already said "Who We Work With"); the stale "Partners" fallback text was the real source of the nav ambiguity. Fixed so source and rendered output agree.

NOT DONE YET — NEEDS CLIENT INPUT

Showing actual partner/client/IP-holder logos on the homepage's "Who We Work With" section needs client-supplied assets and clearance that aren't in hand. Flagged for a future pass.
